

Waste Management Improvement Project in Medan, Indonesia

Shinryo, KEPA, Kyushu Institute of Technology, Kyushu University

Grassroots Technical Cooperation Project (Local Government Type) (JICA, Sep 2013~) ③⑥

Create waste management system in cooperation with the Medan Environment Bureau, and address recycling, reduction, and proper treatment of waste. The following main activities are carried out onsite:

- Basic studies on waste and the environment
- Technical guidance on composting of organic waste
- Efficient use of waste management system and public awareness
- Development of human resources who will be in charge of waste administration

<Effective use of waste>
Produce high-quality compost from the effective use of waste (phosphate gum) from refinery plants
