

Development of Urban Environmental Improvement Plan in Rayong Province, Map Ta Phut City, and Rayong City, Thailand

MI Consulting, Pacific Consulting

Commissioned project from The Overseas Human Resources and Industry Development Association (HIDA) (FY 2014-2015) (56)

Support is being offered to the staff of the local governments in Rayong Province and the cities of Map Ta Phut and Rayong, which have developed as a heavy chemical industrial area, for the analysis of the current situation based on the background of the deterioration of the urban environment and formulation of plans to improve the urban environment (improvement plans for waste issues).

Over three workshops, this project aims to develop the capacity of local governmental staff through the planning process, making use of the Kitakyushu Model (knowledge of advanced cases, task analysis, planning techniques to solve problems, and planning and management capacity, other), and examining the potential of becoming a model case in the urban environmental improvement planning process in Thailand and ASEAN countries, including cities.
